Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to a pharmaceutical composition comprising a disrupted cell suspension of *Monilia albicans* and euglobulin, classified in class 424, subclasses 274.1 and 531.
- II. Claims 4 and 6-9, drawn to a pharmaceutical composition and a method of treating canine distemper virus, classified in class 424, subclass 213.1.
- III. Claims 5 and 10-13, drawn to a pharmaceutical composition and a method of treating neurological disorders, classified in class 424, subclass 570.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II, III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the instant product of group I can be used in materially different processes of using the product, i.e., the methods of Groups II or III. Alternatively, the methods of Groups II or III can be practiced with materially different products, as evidenced by the list of conventional drugs in Example 5 beginning on page 11 of the instant disclosure.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different

Art Unit: 1648

inventions are drawn to different methods, which require different ranges of doses for the composition administered. In addition, the methods encompass different subject populations to be treated based on symptomology, pathology and etiology.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shanon Foley whose telephone number is (571) 272-0898. The examiner can normally be reached on M-F 6:00 AM - 2:30 PM.
